#### **Quarterly forecast for production results and comments**

The main purpose of Kubanenergo in 2018 is trouble-free operation during winter and summer peak demands, timely implementation of the activities of supervisory authorities to obtain a certificate of preparedness, the performance of investment and maintenance programmes that will create an opportunity for further connection of consumers to the networks of Kubanenergo PJSC and minimization of excessive losses.

To fulfill the targets of financial and economic activity of electricity transmission it is necessary: to implement the planned structure of productive supply by voltage levels; to eliminate the growth of costs on housekeeping overheads and uncontrolled expenses of the Issuer.

A significant risk in 2018 for electricity transmission is:

- imprecise planning of balances of electric energy and capacities by the regional market participants and Regional Energy Commission of the Krasnodar region
- approval of the mid-year of the electricity transmission tariffs for the newly formed network of related organizations, the emergence of uncompensated costs on them
- in case of transition to payments for network maintenance there increases economic responsibility of sales companies for non-compliance of the actual structure of productive supply to consumers from the planned, by voltage levels
- low payment discipline of energy selling companies, failure to comply with their contractual obligations.

#### **Technological connection of consumers to the Company's electric grids**

In the second quarter of 2018 the Company concluded 7 525 grid connection contracts for the total

capacity of 243 MW. The company received 212 million rubles (VAT excluded), and revenue amounted to 80 million rubles (VAT excluded). The revenue was mostly received from applications for capacity in excess of 150kW.

The actual number of connected consumers in the second quarter of 2018 was 6 462 customers with the total capacity of 131 MW.

In total, within 6 months of 2018, the Company concluded 13 342 grid connection contracts for the total capacity of 391 MW. The company received 2 223 million rubles (VAT excluded), and revenue amounted to 144 million rubles (VAT excluded). The revenue was mostly received from applications for capacity in excess of 150kW.

The actual number of connected consumers within 6 months of 2018 was 11 990 customers with the total capacity of 232 MBт.

4	Net profit (loss)	-914 385	-37 417

Changes in financial and economic activity of Kubanenergo within 6 months of 2018 compared with indicators of the 6 months of 2017 are characterized by:

- the growth of revenue from sale of products (services) by 3 379 million rubles, or 18% in the reporting quarter; this is mainly due to increase of revenue from transmission services by 3 473

million rubles in the result of applying in the first half of 2018 the tariffs for electricity transmission according to the order of the Regional Energy Commission – Price and Tariff Department for the Krasnodar Region No. 63/2017-e of 28.12.2017 that are higher than the tariffs for electricity transmission according to the order of the Regional Energy Commission - Price and Tariff Department for the Krasnodar Region No.30.12.2016 No.57/2016-e for the first half of 2017. At the same time, the approved one-part tariffs for the first half of 2018 equal to the approved tariffs for the second of 2017 (expenses for connection to the networks of FGC UES PJSC - 220 kV substation “Buzhora” in the amount of 1 216 million rubles are included in the required gross proceeds for 2017 in accordance with the decision of the FAS Russia No. SP/36275/16 of 30.05.2016 on partial satisfaction of the requirements specified in the application of Kubanenergo PJSC on pre-trial consideration of the dispute with the Regional Energy Commission Price and Tariff Department (registration No.35753/16 of 18.03.2016), taking into account the changes introduced by the decision of FAS Russia No. SP/43816/16 of 28.06.2016. The increase in one-part “boiler” tariffs since 01.07.2017 was 4.3% compared to the approved one-part tariffs for the second half of 2016). Also, the increase in revenue was influenced by a change in the order of reimbursement to the participants of the Wholesale Electric Energy Market for the cost of load losses recorded in prices at the Wholesale Electric Energy Market, as a result from 01.08.2017 expenses for purchased electric energy to compensate losses are formed without deduction of specified value (paragraph 1b of RF Government Regulation No. 810 dd. 07.07.2017 “On amendments to certain acts of the Government of the Russian Federation regarding the issues of payment for electricity losses at wholesale market of electric energy and capacity and retail electricity markets, as well as obtaining the status of a subject of the wholesale electricity and capacity market”);

- increase in production costs, including administrative expenses by 2 378 million rubles or by 14%, which is due to increase in costs of services of network transmission companies

- increase in net profit as of the end of the reporting period by 877 million rubles.

The accounting policy of the Company allows to structure revenue and cost of goods sold (services) by business areas with access to the overall financial performance of the company.

By the results of six months of 2018 the revenue from sales of products, work and service amounted 22 256 million rubles, which is 3 379 million rubles, or 18% higher than within six months of 2017. This is mainly due to increase of revenue form transmission services by 3 473 million rubles in the result of applying in the first half of 2018 the tariffs for electricity transmission according to the order of the Regional Energy Commission – Price and Tariff Department for the Krasnodar Region No. 63/2017-e of 28.12.2017 that are higher than the tariffs for electricity transmission according to the order of the Regional Energy Commission - Price and Tariff Department for the Krasnodar Region No.30.12.2016 No.57/2016-e for the first half of 2017. **Expenditures:**

#	Expenses for production and selling of products	mln. rubles	Rate of growth, %
			6 months of 2017/ 6 months of 2018
1	6 months of 2017	17 478.9	113.6
2	6 months of 2018	19 857.1	

The growth in costs for production and sales of products for 6 months of 2018 by 2 378 million rubles compared to the same period in 2017 was due to an increase in the costs of grid transmission companies’ services, depreciation, taxes and charges.

The increase in costs on “Services of grid companies for the transmission of electricity” by 2 195 million rubles is caused by:

- the growth in costs for the services of FGC UES PJSC for transfer of electricity by 675 million rubles due to the increase in the volume of power losses by 10% compared to the same period of the previous year, as well as because of a change in the procedure for reimbursing the participants of the

Wholesale Electric Energy Market for the value of the load losses recorded in the prices of the Wholesale Electric Energy Market, as a result of which, on 01.08.2017 the costs for the services of FGC UES PJSC are formed without deduction of the specified cost

(paragraph 1b of RF Government Regulation No. 810 dd. 07.07.2017 “On amendments to certain acts of the Government of the Russian Federation regarding the issues of payment for electricity losses at wholesale market of electric energy and capacity and retail electricity markets, as well as obtaining the status of a subject of the wholesale electricity and capacity market”);

- an increase in expenses on “Services of distribution grid companies” by 1,520 million rubles due to the increase in the volume of transmitted electricity through networks of local grid operators by 13% and increase in the value of capacity in contracts for the provision of services with local grid operator by 5%.

Growth of expenses on “Depreciation” by 55 million rubles is caused by commissioning of the fixed assets of the power grid complex in the framework of the implementation of the Company’s Investment Programme.

Growth of expenses on “Taxes and fees” by 108 million rubles occurred due to the increase in the amount of property tax as a result of implementation of the Company’s Investment Programme. In addition, the increase in expenses is due to an increase in the tax rate applied to power transmission lines and facilities, which are their integral technological part from 1.6% in the first half of 2017 to 1.9% in the first half of 2018.

The reserve for estimated liabilities, formed according to the controversial requirements of electricity suppliers for electricity transmission in accordance with PBU 8/2010, approved by order of the Ministry of Finance of Russia No. 167n of 13.12.2010 for 6 months of 2018 is calculated at a rate of 43 million rubles, which is 625 million rubles lower than the same period of the previous year. Due to the lengthy procedure for concluding a contract with FGC UES PJSC – “Sochi PMES” in the first half of 2017 a reserve was created for disagreements with local grid operator for the amount of rendered services in the amount of 563 million rubles. In addition, in the first half of 2017, a reserve was created for disagreements on the cost of compensation for losses amounting to 67 million rubles.

The dynamics of the remaining items is insignificant.

### 3.2.4. Target markets of the Issuer's products (works, services)

Core markets wherein the Issuer carries out its activity:

The Company is the largest electric power grid company in the Krasnodar Territory and Republic of Adygea carrying out transmission and distribution of electric energy across electric power grids with voltage equal or below 110kV among the populated localities, in rural settlements and individual cities and regional centres of the Krasnodar Territory and Republic of Adygea including Sochi.

The total market share of the Company was 69.03% in 2017 and 67.52% within 6 months of 2018. Kubanenergo PJSC carries out its main activity under conditions of natural monopoly regulated by the state to the extent of establishment of tariffs for electric energy transmission and provision for non-discriminatory consumers' access to electric power grids. Taking into account the growing demand for electric energy in the region, the Company pays great attention to development,

reconstruction and increase of carrying capacity of electric power grid facilities, reckoning on increase of one's services sales volume in future.

Since 01.01.2007 a "boiler" method of settlements for transmission of electric energy is in force in the region, with the "boiler holder" status reserved to "Kubanenergo" PJSC. This means that all energy selling companies marketing electric energy in the regional market pays to "Kubanenergo" PJSC for services for electric energy transmission across electric power grids of the whole regional energy system within the framework of contracts for electric energy transmission while "Kubanenergo" PJSC pays for electric energy transmission services to territorial grid companies.

Since September 22, 2011 an individual calculation scheme based on the "boiler below" principle has been used in the Krasnodar region with regard to LLC "Maykop CHP" Grid Company. Within the framework of this scheme, "Kubanenergo" PJSC provides electric energy transmission services to LLC "Maykop CHP" grid company and receives payment as per the individual tariff established by REC-PTD KT.

In the reporting quarter, the core consumers of "Kubanenergo" PJSC energy transmission services were:

- 2 guarantee suppliers – subjects of the wholesale and retail markets that sell electricity to end users connected to the Company's electric grids and networks of other network organizations ("NESK" JSC, "TNS EnergoKuban" PJSC),
- 29 energy selling companies– subjects of the wholesale and retail markets that sell electricity to end users connected to the Company's electric grids and networks of other network organizations ("MAREM+" LLC, "Rusenergobytt" LLC, "Rusenergovers" LLC, "Transservisenergo" JSC, "RN-Energo" LLC, "Southern Energy Retail Company" LLC, "MagnitEnergo" LLC, "Mosenergobytt" PJSC, "KES" LLC, "Yugstroy-Energobytt" LLC, "Energy Efficiency" LLC, "Kvant" LLC, "NSK" LLC, "Transneftenergo" LLC, "Rusnergo" LLC, "RegionEnergoKontrakt" LLC, "Mezhregionenergobytt" JSC, "Energobytt" LLC, "Garantenergo" LLC, "KNGK-Energo" LLC, "Alternativ-Energo-Sbyt" LLC, "AER" LLC, "AER Crimea" LLC, "ProfServisTrade" LLC, "Forest" LLC, "UES Garant" LLC, "ESK Nezavisimost" LLC, "VN-Energotrade" LLC, "Retail Energo Consult" LLC);
- 97 consumers that concluded with Kubanenergo PJSC direct contracts for electricity transmission ("Novorostsement" JSC, "Tamanneftegaz" CJSC, "EuroKhim-Belorechenskie Minudobreniya" LLC, "Poultry farm "Primorskaya" LLC, "Fanagoria" APF, "Agriculture stud farm "Pobeda" CJSC, Federal State Budgetary Institution "Board of Kubanmeliovodkhoz", "Sad-Gigant" JSC, "Verkhnebakan cement factory" JSC, "Abrau Durso" CJSC, "Novoroslesexport" JSC, "Stud farm "Leninskiy put" JSC, "Stud farm "Gulkevichskiy" CJSC, "RAMO-M" CJSC, "Novomol" LLC, "Pioneer" JSC, "Novorossiysk commercial seaport" PJSC, "Formika-Yug" LLC, "Kanevskiy Gas Fitting Plant" LLC, "IPP" JSC, etc.), concluded Agreement for the transmission of electricity;
- commercial grid company ("Maikop CHP" LLC).

**Factors that may affect the products (works, services) marketing by the Issuer and possible actions of the Issuer to reduce such effect:**

Negative factors that may have a negative effect on "Kubanenergo" PJSC products marketing represent political risks associated with:

- political risks associated with decisions of the Russian Government on the development of the power industry,
- risks associated with the relationship with local authorities,
- economic risks connected with state regulation of prices on the Issuer's services,
- financial risks associated with the conditions and the cost of borrowed resources;
- risks associated with the operation of the main equipment (power transmission) and other risks.

Currently, the Issuer does not forecast substantial deterioration of the situation in the industry. In case of substantial deterioration, the Issuer plans to make risks analysis and to take corresponding decision in each specific case.

#### IV. Information on the Issuer's business activity

#### 4.1. Results of business activity

Dynamics of indicators showing the issuer's business activity, including its profitability and loss calculated on the basis of data of accounting report

Standard (rules) applied for making the accounting report: **RAS**

Unit of measurement for the sum of uncovered loss: **thousand rubles**

Indicator	6 months of 2017	6 months of 2018
Net profit, %	-4.84	-0.17
Asset turnover ratio, times	0.28	0.29
Profitability of assets, %	-1.36	-0.05
Profitability of internal capital, %	-2.69	-0.11
Sum of non-covered loss as of reporting date	13 942 069	12 848 216
Ratio of non-covered loss as of reporting date and balance currency	20.74	16.74

All indicators are calculated on the basis of the recommended methods of accounting

Economic analysis of profitability/unprofitability of the issuer, based on dynamics of these indicators, and reasons according to management bodies led to losses/profit of the issuer specified in the accounting report:

Indicators of return on assets and equity by the results of 6 months of 2018 are negative because of the presence of loss by the results of the reporting period. Return on equity has increased by the results of 6 months of 2018 by 2.59 and amounted "minus" 0.11%. A significant impact on the growth of this indicator in the reporting period was the increase in the Company's net profit by 3 473 million rubles, or 19%.

Opinions of the issuer's management bodies on the causes or their effects on the financial and economic activities are not the same: **None**

Member of the Board of Directors (Supervisory Board) of the Issuer, or a member of the collegial executive body that has a special opinion on the reasons and/or their impact on the financial performance of the issuer, as reflected in the minutes of the meeting (session) of the Board of Directors (Supervisory Board) of the Issuer or the collective executive body, which considered the relevant issues, and insists on such a view in the quarterly report: **None**

#### 4.2. Liquidity of the Issuer, sufficiency of equity and current assets

Dynamics of indicators showing the issuer's liquidity

Standard (rules) applied for making the accounting report: **RAS**

Unit of measurement for the sum of net fixed assets index: **thousand rubles**

Indicator	6 months of 2017	6 months of 2018
Net fixed assets index	-1 663 490	-2 776 998
Current liquidity ratio	0.85	0.83
Quick liquidity ratio	0.71	0.74

By issuers decision the dynamics if indicators characterizing issuer's liquidity is additionally disclosed, the indicators are compiled on the basis of data of consolidated accounting report which is included in the quarterly report: **no**

All indicators are calculated on the basis of recommended methods of accounting: **yes**

Economic analysis of the liquidity and solvency of the issuer, the issuer's capital adequacy for fulfillment of the short-term liabilities and to cover current operating expenses based on the economic analysis of the specified parameters describing the factors which, in the opinion of the issuer, had the most significant effect on the liquidity and solvency of the issuer:

The indicator "Net working capital" has decreased by the results of 6 months of 2018 in comparison to the same period of 2017 and amounts – 2 776 998 thousand rubles. The optimum amount of net working capital (net working assets) is determined in accordance with the individual needs of each company and depends on the size and characteristics of its activities, the turnover period of inventories, receivables, and on the conditions of borrowings and loans, etc.

The current liquidity ratio allows to determine how many times current assets cover short-term liabilities. Current liquidity ratio in comparison with the similar period in 2017 has increased by 0.02 points, and amounted 0.83.

The quick liquidity ratio shows how the most liquid assets cover the short-term liabilities of the Company. By the results of 6 months of 2018, the quick liquidity ratio decreased by 0.02 in comparison with the same period in 2017 and amounted 0.74.

The main reason for these changes: increase in short-term accounts payable, including increase in the amount of advances received from applicants under technological connection agreements.

Opinions of the issuer's management bodies on the causes or their effects on the financial and economic activities are not the same: **None**

Member of the Board of Directors (Supervisory Board) of the Issuer, or a member of the collegial executive body that has a special opinion on the reasons and/or their impact on the financial performance of the issuer, as reflected in the minutes of the meeting (session) of the Board of Directors (Supervisory Board) of the Issuer or the collective executive body, which considered the relevant issues, and insists on such a view in the quarterly report: **None**

- Utility patent No. 2656004 of 30.05.2018 “Method to detect topology of overhead power lines”

Federal Intellectual Property Service adopted and registered the following applications:

- Application for invention No. 2018116512 of 03.05.2018 “Method of connection of reflectometry device to overhead power lines”

The main directions and results of use of main for the issuer intellectual property objects:

It was offered to continue using the following results of R&D projects received earlier:

- microprocessor adaptive fine protection of near and remote redundancy of transformers of tap-off and intermediate substations. The specified protection provides a high sensitivity to short circuits for transformers by detecting emergency operation against the background of a comparable level of current load, start-up (self-starting) of electric motors, the influence of transition resistance of the electric arc.

- system of control of power transformers insulation using method of searching of partial discharges. The system prevents accidents, speeds up the detection of insulation defects, decreases repair time and controls quality of repair works.

- software package for calculating process losses “RETP-6-10kV” to reduce losses of electric energy due to the creation of regimen of feeders 6-10kV from possible loop systems and economic justification of power selection and location of additional reactive power sources.

Risk factors associated with the possible expiry of the basic patents, licenses for the use of trademarks:

There are no risks associated with the expiration of the patents and licenses for the use of trademarks in the Issuer.

#### **4.6. Analysis of development trends in the sphere of Issuer's core activity**

Implementation of investment programmes of Kubanenergo, that ensure development, technical re-equipment and upgrade of the Company's power networks, will help provide reliable power supply to the existing and future electricity consumers in the next to come.

Positive factors and conditions affecting the Issuer's activity are:

- growth of energy consumption in the region
- increase of payment discipline of energy selling companies and "direct" consumers
- growth of capacities commissioned
- digitalization of power networks and automation of business processes
- power redistribution among consumers according to their needs (actual consumption).

Negative factors and conditions affecting the Issuer's activity are:

- ageing of the Issuer's core equipment
- necessity to provide meter reading because of the absence of automated system of remote control and accounting of electric energy
- increase in losses of active energy consumed for heating of wires due to the lack of compensation of reactive power.

General evaluation of the results of Issuer's activity in this particular sector; correspondence of the results of the Issuer's activity to the trends in the sector development; reasons justifying the obtained results of the activity (satisfactory and unsatisfactory results, in the Issuer's opinion):

The main result of the Issuer's activity in power industry consists in provision of reliable and uninterrupted power supply to consumers, consistent implementation of investment projects on construction and upgrade of overhead lines, substations and power industry facilities, primarily oriented at provision for uninterrupted power supply in the Krasnodar region's seaside areas (along the Black and the Azov Seas coasts), Krasnodar as a social and cultural centre, as well as implementation of projects on the Taman peninsula: "Construction of transport passage through the Kerch Strait" and "Project on construction of dry cargo district in the Taman port".

#### **4.7. Analysis of factors and conditions affecting the Issuer's activity**

The impact of inflation, changes in exchange rates, government decisions, economic, financial, political and other factors affecting the business activity of the issuer and which influenced the amount of revenue from sale of goods, products, services and income (loss) from core business.

In the current macroeconomic conditions, the core activity of the issuer is influenced by inflation and changes in market conditions. In addition, the growth of productive supply and electricity transmission revenue is due to increase of energy consumption, including through the development of infrastructure of the Krasnodar region and the Republic of Adygea.

Prices (tariffs) on the Company's services on energy transmission and grid connection are subject to tariff regulation.

On 28.12.2017, the Order of the Regional Energy Commission of the Krasnodar region No.63/2017-e approved uniform (boiler) tariffs on transmission services for 2018. One-part tariffs for 2018 were approved at the maximum possible level of tariffs for 2018. The growth of one-part tariffs on transmission services amounted 3.0% for 01.07.2018.

Growth of approved "boiler" net electricity supply of Kubanenergo PJSC for 2018 in comparison with 2017 amounted 3.0%.

Growth of approved “boiler” required gross revenues of Kubanenergo PJSC for 2018 in comparison with 2017 amounted 8.2%.

Growth of approved “boiler” required gross revenues for maintenance of power grids of Kubanenergo PJSC for 2018 in comparison with 2017 amounted 15.2%.

Growth of average “boiler” tariff for 2018 in comparison with 2017 amounted 5.0%.

On 27.12.2017, the Order of the Regional Energy Commission of the Krasnodar region No.62/2017-e for Kubanenergo PJSC approved long-term parameters of regulating for 2018-2022.

On 28.12.2017, the Order of the Regional Energy Commission of the Krasnodar region No.66/2017-e “On setting the price for technological connection to electric networks of grid companies on the territory of Krasnodar region and Republic of Adygea” approved standardized tariff rates and rate of payment for the unit of maximum capacity for technological connection to grids of Kubanenergo PJSC for 2018.

Growth of rate of payment for the unit of maximum capacity for coverage of maintenance costs (C1) in comparison with last year amounted 3.3%. Standardized tariff rate C1 per 1 connection was approved.

On 31.10.2017, in connection with the entry into force of the Order of Federal Anti-Monopoly Service No. 1135/17 dd. 29.08.2017 “On approving of methodological instructions on specifying the amount of payment for technological connection to power grids”, the list of rates for coverage of expenses for construction of power grid facilities is expanded (approved C2, C3, C4, C5, C6, C7).

Standardized tariff rates and rates for the unit of maximum capacity are set to be the same for territorial grid organizations in the territory of the Krasnodar region and the Republic of Adygea.

Undeveloped networks in particular districts of the Krasnodar region and the Republic of Adygea together with ever growing demand have led to overloading of power lines and transformers.

Reliability of power supply is reduced because of the aged equipment, which means extra expenditures for keeping the equipment going.

**In the part of power transmission services, the Issuer’s activity is influenced by:**

- due to the fact that calculation of technological losses is performed based on regular network scheme (steady state operation), all changes in its parameters and configurations influence the amount of energy losses (necessity of redistribution of loads related to prevention of emergency situations in networks of Kubanenergo PJSC, and in the networks of related entities of electric power; technological necessity under the instructions of the Regional Dispatch Control). These forced changes to the normal network scheme usually lead to a significant increase in the actual losses of electricity as due to losses in the power transformers, and power loss occurring due to the transmission of additional reactive power derived from the backup power transformers and increased for the reasons given admission to the network

- shortage of record-keeping equipment makes impossible to analyze in due time the load on networks.

These factors are components of general trend of service market development, in the opinion of the Issuer, they are able to have positive influence on the activity in the medium term.

**Measures taken by the issuer and activities the issuer plans to arrange to efficiently use these factors and conditions:**

The Company pays great attention to development of its power grid facilities using scientifically grounded technical solutions and tested technologies and modern electrical equipment.

In order to meet consumers’ demand for more capacity, a reliable and uninterrupted electricity supply, the Company is investing considerable funds for the reconstruction of electrical networks and the creation of new connection points.

The Company continuously interacts with the Prices and Tariff Department in order to establish reasonable tariffs.

The list of internal and external measures, taken to increase the efficiency of business processes in both Kubanenergo PJSC and the group of companies Rosseti PJSC in general, has been defined taking into account the prevailing macroeconomic conditions.

**Methods used by the issuer and methods the issuer plans to use in the future to reduce the negative effect of factors and conditions influencing the issuer's activity:**

**Currently Kubanenergo PJSC implements the following programmes:**

- investment and repair programme;
- complex of events in accordance with requirements of Regulations on Certificate of Reliability;
- studying the conception of digitalization of power grid complex and automation of business processes.

These programmes are aimed at ensuring further development, technical upgrade and reconstruction of the Company's grid facilities, which will improve the state of electricity supply to electricity consumers in the forthcoming years.

Digitalization of power grid and automation of business processes will allow control centre instantly receive a signal on disconnection of any network section and eliminate the problem as soon as possible.

Each substation comprises lots of complex equipment that has to be operated. Automation of equipment (as part of digitalization) will allow to decrease hand labour of engineers, operational and repair personnel, specialists of relay protection and other workers that carry out maintenance of power facility.

Digitalization of power grid equipment is automated remote control, the possibility of self-diagnosis of equipment, as well as compactness, which is especially important in the reconstruction and development of network infrastructure in settlements with dense buildings.

Digitalization of power grid equipment will allow to increase the reliability of power supply for customers.

In addition, the issuer applies the following methods:

- implementation of measures aimed to improve the payment discipline and reduce the accounts receivable for electricity transmission services, including the elaboration of mechanisms of consolidation of transmission assets;
- optimization of the investment costs;
- providing cost savings through effective use of material resources, increase productivity, optimization of the organizational structure of the Company (without loss of qualified personnel);
- imposition of limitations on power consumption in case of debts in payments for the electricity from the customers;
- carrying out work on the consolidation of property owned by territorial grid companies that do not meet the criteria of referring the owners to territorial grid companies, approved by the order of the RF Government No.184 dated 28.02.2015 "On attribution of owners of grid facilities to territorial grid companies".

**Significant events/factors that may have the most negative impact on the possibility gaining by the Issuer in the future the same or better results as compared to the results obtained for the last reporting period, as well as the likelihood of such events (factors):**

Development of infrastructure of the region that is in the Company's area of responsibility, construction of various objects is accompanied by an increase in electricity consumption. There is a situation in which may occur and increase the risks of ensuring reliability of electricity supply to consumers and stable operation of the power grid due to overloading of transmission lines and transformers in normal and post-emergency conditions, as well as the wear and tear of power equipment. Number of equipment, buildings and structures that are worn-out and subject to replacement, reconstruction or technical re-equipment is growing constantly. The probability of such events is estimated by the Company as average.

Among negative factors and conditions affecting the Issuer's activities are half automatized electricity metering systems, which reduces the accuracy of the reporting of account information from user. Significant events/factors that may improve the performance of the issuer, and the probability of their occurrence and their duration:

- growth of energy consumption in the regions of the Company's presence,
- implementation of the investment programme, which allows to increase operational efficiency,
- improving the payment discipline of retail companies and "direct" customers;
- redistribution of power between consumers according to their needs (actual consumption);
- development of energy service activities, automation of electricity metering in networks with problem areas helps to reduce losses;
- solution of public authorities in setting tariffs for electricity transmission and to ensure non-discriminatory access of consumers to power grids,
- decrease in interest charged by banks on credit contracts due to changes in financial market conditions,
- minimization of operating costs as part of the performance management programme of activities that allow the Company to achieve the target to reduce the cost of electrical equipment maintenance unit by 15% by 2018 from the level of 2012, and achieve a reduction in operating expenses by at least 3% compared to the previous year.

Implementation of the developed by Kubanenergo investment programmes, projects on increasing efficiency, reliability and safety of production and repair programme that ensures development, upgrade and reconstruction of grid facilities of the Company as well as their digitalization, will provide reliable power supply of the existing and future consumers of electricity in the years to come. The likelihood of such factors is estimated by the Company as considerable. To anticipate the duration of these events is not possible due to the uncertainty of the economic situation development in Russia and in the world in general.

- National anti-corruption plan for 2016-2017 approved by the Decree of the President of Russia No. 147 of 01.04.2016;
- Methodological recommendation of Federal Agency for State Property Management and other instruction of federal executive authorities.

The Issuer approved a list of anti-corruption measures for Kubanenergo, providing for the implementation of activities and procedures and the procedure for their implementation.

The Programme of anti-corruption measures in Kubanenergo PJSC (Order of Kubanenergo PJSC No.

140 of 13.02.2018) is developed and approved for 2018, and it:

- contains plan of measures (list) connected with development/updating of internal local standard acts of organizational and operational level, implementation of organizational measures, approving of system monitoring procedure and results of measures on implementation of anti-corruption policy of Rosseti PJSC and subsidiary and dependent companies of Rosseti PJSC;
- assigns persons responsible for implementation of specific measures;
- assigns schedule of specific measures implementation;

**Keynotes of anticorruption policy:**

- assignment of departments responsible for prevention of corruption offenses and the fight against corruption
- organization of management and internal control processes in sphere of prevention and countermeasure of corruption
- monitoring of risks management and internal control systems
- identifying and resolving conflicts of interest
- development and introduction of standards and procedures designed to ensure fair work
- legal education and laying the groundwork of law-abiding behavior of workers, consulting and training of Company's employees;
- adoption of measures to combat and prevention of corruption in cooperation with organizations of contractors
- cooperation with public authorities exercising control and supervisory functions
- participation in collective initiatives for combating and preventing corruption.

All this imposes a special obligation on the Issuer at forming a single vertically-integrated system of implementation of anti-corruption policies within the Rosseti Group, which is controlled by the state. In this connection, the Issuer uses standard contractual anti-corruption clauses.

Kubanenergo PJSC pays great attention to the formation of transparent business standards. The automated system – “Analysis and collection of information on the beneficiaries” was created. The system allows collecting data from multiple sources into a single information space, providing test data on legal entities and individuals, identifying signs of affiliation, conflict of interest, pre-conflict situations, and other abuses.

**The structural unit of the Company responsible for the prevention and fight against corruption performs the following functions:**

- carries out activities aimed at implementation of the principles and requirements of the Anti-Corruption Policy;
- carries out monitoring activities aimed at identifying corruption and other offenses;
- reviews reports of possible facts of committing corruption and other offenses by employees, contractors of Rossetti PJSC and its affiliated companies or other persons/entities;
- organizes the completion and review of declarations of conflict of interest;
- organizes training activities for the prevention and combating of corruption and individual consultation of employees;
- evaluates the results of anti-corruption work and reporting materials management organization;
- carries out activities to prevent and counter corruption and other offenses, conflicts of interest;
- develops anti-corruption standards and provides technical assistance in the implementation of measures for combating and preventing corruption and legal education of employees;
- coordinates the activities of the structural units in the sphere of implementation of anti-corruption policy;
- prepares documents in the sphere of combating and prevention of corruption and initiates the updating of documents in connection with changes in the anti-corruption laws of the Russian Federation.

The Issuer has approved and applies the Procedure for receiving, considering and resolving the applicant's reports (employees, contractors Kubanenergo PJSC and other natural and legal persons) on the possible cases of corruption, the Regulations for the Commission of Kubanenergo for Compliance of corporate ethics and conflicts of interest, the Regulations for the settlement of the conflicts of interest in Kubanenergo PJSC.

The Issuer updated the Commission on compliance with the rules of conduct and conflict of interest in Kubanenergo PJSC, organized work on the prevention of corruption, provided legal education and formation of the foundations of law-abiding behavior among employees of the electric grid complex and many other anti-corruption procedures, introduced an interactive channel of communication with applicants through the corporate web-site, the "hotline" for reporting on corruption.

Information about the activity of Kubanenergo PJSC in the field of preventing and combating corruption is available on the Company's web site at: <http://kubanenergo.ru/o-kompanii/antikorrupsionnaya-politika/>
